

5G antennas: I investigated this with eyes wide open. I am not a conspiracy theorist, but the censorship alone made me suspicious!
What is really going on?

May, 2020

Dear Partner,

I read all our web site emails myself. Someone wrote: **"Is Covid 19 really 5G poisoning?"** This was going to be a "Dear Leo" answer, but what I found out is HUGE! It is an existential threat to all life on our planet . . . not only our rescued animals, but all life!

What I am going to tell you will affect you one of two ways. You will either read the book that I will recommend, to start your own investigation, or you will succumb to "cognitive dissonance."

That is a fancy term for wanting life to be our usual routine and nothing that interferes with that routine can be allowed to penetrate our sense of reality . . . even the truth.

So when many reports say something is black and one dissenting opinion ridicules those reports saying that something is really white, we usually choose to believe in white despite all the evidence to the contrary . . . because that makes it is easier to go on with our usual lives, and to not disrupt them with new information.

Well Covid 19 sure kicked our belief constructs in the butt!

And what I am going to tell you next will make Covid 19 look like "amateur night in Dixie!"

One of our supporters wrote in to me and recommended a book . . . **INVISIBLE RAINBOW** . . . by *Arthur Firstenberg*. When I read just the description I bought it on *Kindle* to get it within minutes. Then, I could not put it down! And I recommend that you do the same . . . **RIGHT NOW!**

If you care about your life, the life of your loved ones, your animals, animals all over the world . . . as well as plants and even

insects . . . you will buy this book *RIGHT NOW*.

Cognitive Dissonance is the tool by which "they" control the narrative, and therefore control us. You can say this is all crazy and forget about it. That's what they want. But please, read on.

Historically the flu epidemics used to break out every 50-years or so in correlation with peaks in solar activity . . . sunspots and solar flares.

You see, we are electrical beings. Our bodies function with electrical signals. Now any outside electricity can disrupt the flow of our own and it can even kill us. "Stay away from downed wires!"

In the 1880's electricity became mainstream. After that, flu outbreaks began to occur **annually**. This is all in the book, which you MUST read!

Evidence shows that viruses are dormant in our bodies and when our electrical system is disrupted those viruses can overtake us. We can also suffer heart attacks and strokes, kidney failure, diabetes, etc. It's all in the book. And the book is not just one man's opinion. He has about 150-pages of bibliography noted!

In the book he says something that will make you crazy given the narrative of today! He says that scientists of the past discovered that the flu does not go epidemic from person to person! It is latent in all of us and every 11-years during the extreme solar cycles it gets activated to the point where it goes rampant.

Now that is an easy one to dismiss as whacky, but there's more.

If the sun does this, through EMF (Electro Magnetic Field), and if electricity, radio waves, microwaves, Wifi, etc, have been doing it even more, then 5G will make it exponentially worse. "End of days" worse.

Wuhan was the first city in China to have full on 5G installed. Figure it out!

Where is 5G? Here is what it looks like in your neighborhood, but it will also be in space. Elon Musk announced plans to put up **48,000** satellites, each sending harmful EMF radiation back to earth . . . to us!

So what is 5G? On the surface it will make your internet and phones go faster. It

forces artificial intelligence to run our lives by 2030, for cars to run without drivers, etc. But it is extremely high frequency waves that will disrupt the electrical system in every living thing on the planet. And you can drop dead from it like some people did in China.

Who is behind it? China, cell phone companies, Google, Amazon, Facebook, Gates, Elon Musk, the Bilderbergs, etc, etc. You can find this info online but as soon as an anti-5G video appears it is taken down and the producers are even banned from the platforms. This is a violation of the First Amendment but they don't care, they own us!

In **late 2019**, just before Covid 19, an **international appeal to stop 5G on Earth and in space** gathered signatures of hundreds of organizations and hundreds of thousands of individuals from 202 countries and territories. Scientists, doctors, engineers, nurses, psychologists, architects, builders, **veterinarians**, beekeepers, ornithologists, and others from every nation have signed this appeal and plans are underway to deliver it to all the world's governments.

April 1, 2020: Swiss insurance companies put EMF radiation on their highest risk category. The Netherlands put a moratorium on 5G until they investigate the 5G health risks. Rome has banned it and Germany is stopping it due to safety risks. England's Parliament is arguing to stop 5G in the UK. And some US Senators are raising the health risks to halt 5G in this country.

August, 2019 Louisiana became first state to call for a study on the health impacts of 5G.

San Francisco has banned antennas on all municipal buildings; **Santa Barbara** is delaying licensing for 60 new 5G antennas on light fixtures downtown; **Los Altos** has denied Verizon and AT&T their 5G.

But **Los Angeles County and LA City** are allowing 5G antennas to go up like weeds! I have pictures of eleven new ones in one canyon that went up during the Los Angeles lock down . . . "surprise!!"

Now if this were a movie, the hero would be trying to stop the powers from implementing a life-ending technology. And the hero and his army would be safe because they would have discovered a magic shield that protects them from the deadly EMF radiation while they work . . . and the happy ending would be that the global network was exposed and destroyed. I have discovered that movie scripts are structured like real life, and there **IS** just such a magic shield!

My investigation has led me to a new technology which puts up a shield against EMF radiation, and even 5G! And I want to get these shields for our animals! It is "**Qi**" and if you look up DaVinci Medical USA and click to "**Qi Shield EMF Radiation**" on their web site you can read all about it. (They also sell hospital ventilators!)

Here is how we're dealing with the Covid 19 portion of this threat to us all at DELTA Rescue. Each staff member gets their temperature taken upon entry to our sanctuary.

And now that we know that half of the Covid cases do not have fevers and the serious ones have lung damage way before shortness of

breath, we will begin taking their pulse oximeter readings to measure the amount of oxygen in their blood.

And they will continue to wear masks and gloves around each other, and around our animals in case our cats and dogs can catch the virus from people.

But since EMF radiation affects all life, it is more likely that the few animals who have tested positive for Covid 19 in New York carried it along with their other corona viruses, and EMF radiation exploded it. I do not think they got it from people. How could they? And what about the incubation period? Is that even real?

We are handling the epidemic well, but how do we protect our animals from EMF radiation especially in light of Los Angeles giving the go ahead for the deadly 5G antennas?

Here's how ... I want to order six **Qi Max** units for our buildings. Each costs \$6,497. Six units will protect our sanctuary from EMF radiation for 8-years, after which the units will be recharged for free.

Please save our animals from this threat, give whatever you can today so we can get this radiation off our beloved animals next week!

For the animals,

Leo

Leo Grillo, founder

PS: Read **Invisible Rainbow**, tell your friends about it, tell your representatives about it, and help us get Qi protection today.
